Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Request for Continued Examination

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 18, 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Gilhousen et al. (US 4,613,901).

Regarding claims 1 and 2, Gilhousen et al. discloses a device and method for evaluating measured data utilizing analog-to-digital conversion so as to obtain digitalized measured data from analog measured data (Figs. 3-4), disseminating said digitalized measured data to a digital signal processor (121) for processing said digitalized measured data by computation, and outputting respective measured values from the processor (Fig. 4), the improvement comprising:

- commonly connecting outputs (123 and 124 are connected to 106, Fig. 4) of a plurality of analog-to-digital converters (104, 105) to said digital signal processor by interfacing (via circuitry of Fig. 4 comprising mux 106) said outputs with a shift register (comprises 119, 120) interposed between the converters and said digital signal processor (119, 120 are between 104, 105 and 121),

- intermediately storing in said shift register digitalized measured data produced by said converters (digital data at 141, 142 are result of outputs of 104, 105, Fig. 4) from analog measured data (at 46a, 46b) until all digitalized measured data to be processed is acquired in the shift register (Fig. 4),

- reading out in a block transfer from the shift register all digitalized measured data to be processed (output of 120 at 2), and

- simultaneously processing in said digital signal processor digitalized measured data read out from the shift register to obtain respective measured values (column 11, lines 55-61, Fig. 4).

Regarding claims 3 and 4, Gilhousen et al. discloses that said shift register is

designed as a FIFO memory (FIFO queue 119).

Response to Arguments

3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
